

# Multi-functional filter F4

For wineries with a year wine production up to 30 000 l

1. Candle kieselguhr filtration
2. Final membrane filtration
3. Integrated CIP system with heating
4. Up to 3 processes at the same time

With F4 you can accomplish  
one-stage, two-stage or even three-stage  
filtration in one step:

- wine or water filtration
- pre-filtration + final wine filtration before bottling
- kieselguhr filtration + protection pre-filtration + final filtration
- sanitation of the filter or subsidiary technology

#### Integrated sanitation CIP system:

- heating and mixing of sanitation agents
- controlled circulation of sanitation agents through demanded systems (Microfiltration cartridges, tanks, bottling line, product piping etc.)

You can process particular filtration stages  
in one step and directly bottle

Increased capacity and lifespan of final  
membrane due to pre-filter protection

CIP system is fitted with heating and  
protection against burn out the heater

Price starts from **7 919€**
