

GS 3 series - DN 15 up to DN 250

Pneumatic control valve for the control of neutral through to highly aggressive media in process engineering, chemical industries and for plant equipment.

- Space-saving wafer-type design
- Lowest possible weight
- Quiet operation
- Fast response
- Control of high differential pressures with small actuators
- Greatly reduced energy consumption rates due to short strokes and low actuating forces on the throttle element
- High Kvs-values

Technical Information

Materials

Body	Stainless steel 1.4408	acier 1.0619
Bodycover	Stainless steel 1.4404 or 316L	
Diaphragm housing	Aluminium, KTL coated	
Packing	PTFE (Carbon filled), spring 1.4310	
Actuating stem	Stainless steel 1.4571, roller burnished	
Bellows	Stainless steel 1.4571	
Fixed disc	Stainless steel 1.4571, coated	STN2-disc
Sliding disc	Special carbon material	SFC-disc (max. 300°C) STN2-disc
Guide ring for sliding disc	Stainless steel 1.4581	

Options

- Metal bellows
- Positioner
 - pneumatic
 - electro-pneumatic
 - electro-pneumatic (Ex, intrinsically safe)
- Limit switches
- Position transmitter
- Manual override

Admissible differential pressures
(For temperatures of up to 120°C with PN-rating
up to 38°C with ANSI-rating)

**For temperatures of 120°C (PN)
or 38°C (ANSI) and above:
obey application limits !**

**Disc pair: carbon - stainless steel coated
SFC - stainless steel coated**

The supply air pressure stated in the table is the minimum supply air pressure that has to be available. This is valid for the usage without positioner. For the usage with positioner the required supply air pressure is being determined by the adjustment of the positioner. For the standard version it is 4 bar ü. The spring configuration "D" allows the usage of a control valve without positioner but with limited performance. The valve can be controlled directly by a process controller with the norm signal of 0,2 up to 1 bar.ww

GS3-Control Valve with pneumatic actuator, DN 80, PN 10/40, stainless steel, spring closes, actuator area 125 cm², 8 springs, PTFE-V-shaped sealings, function unit carbon-stainless steel 1.4571 coated, linear characteristic, i/p-positioner ex-proof

Application limitations for GS3 valves in stainless steel

These pressure must not be exceeded for GS-valves from the GS3-series made of stainless steel, even though the actuator power might allow it.

Application limits for carbon steel bodys on request.

Limitation for SFC-sliding discs: 300°C

Application limitations for GS3 valves in carbon steel

These pressure must not be exceeded for GS-valves from the GS3-series made of carbon steel, even though the actuator power might allow it.
